

F-18 reliability vs F-7 informativeness — V8 is the only recipe high on both

V8 (green star) stays above 0.95 on F-18 across Q while rising monotonically on F-7. V20 (purple circle) wins F-7 and rises monotonically but stays at ~ 0.45 on F-18 (informative-but-seed-sensitive). V2 (cyan square) collapses on F-18 with Q while staying flat on F-7.
